FLO is a modern LED lighting collection designed for precise, comfortable illumination with flexible adjustability. Its curved form incorporates an adjustable shade that allows light direction to be easily controlled—ideal for various areas where glare-free light is important.

Each fixture features a high-performance, full-spectrum LED (Ra > 97) that produces warm, natural light with excellent color accuracy. Clean engineering ensures a refined, seamless profile, while integrated dimming allows smooth transitions from task lighting to ambient light. A subtle aged-gold accent adds warmth without detracting from the minimal design.

Available as linear suspension, large suspension, and table lamps, the FLO collection supports cohesive lighting across residential and hospitality interiors.
